

Configuring Your Browser

If you are using ProQuest for the first time, you may want to review the following requirements for your Internet browser:

- Use Microsoft Internet Explorer 5.01 or later, or Netscape Navigator browser versions 4.75, or 6.01 or higher. It is recommended that you use Netscape Navigator 6.01 or higher and Internet Explorer 5.01 or higher.
- Enable JavaScript (enabled by default). If you disable JavaScript, ProQuest interface features will not operate properly.
- [Install Adobe Acrobat Reader](#).
- [Accept cookies](#).

The following instructions will guide you through the steps needed to configure these browser options. If you have questions, refer to your browser's help menu, or contact ProQuest Electronic Technical Support at 800-889-3358. International clients can call +1-734-761-4700 extension 2513.

If you are trying to configure your browser to work with Korean or Chinese characters, see [Configure Your Browser to Display Chinese and Korean Characters](#).

Install Adobe Acrobat Reader

ProQuest provides article page images in Adobe PDF (Portable Article File) format. To view these articles, you need Adobe Acrobat Reader installed on your system. If you do not have it, you can [download Adobe Acrobat Reader](#) for free.

Accept Cookies

Cookies are a general mechanism that allows the server side of a connection (in this case, the ProQuest Information and Learning server) and the client side of the connection (your computer) to maintain information about a particular session. By using cookies, we can keep track of your pending article retrievals and your display and search options for the current ProQuest session.

Cookies are not used by ProQuest Information and Learning to collect marketing information or for any other purpose other than to make using our products as easy and efficient as possible.

Most browsers provide an option for alerting you when cookies are used. If this option is checked, you will see an alert dialog when using ProQuest. To prevent the alert dialog from displaying every time cookie information is transferred, you should disable this alert mechanism and allow our server to accept cookies.

If using Netscape Navigator 4.x and higher:

- 1 Click **Preferences** on the **Edit** menu.
- 2 Click the **Advanced** category.
- 3 Clear the check box next to **Warn me before accepting a cookie**.
- 4 Click **OK**.

If using Microsoft Internet Explorer 5.x and higher:

- 1 Click **Internet Options** on the **Tools** menu.
- 2 Click the **Security** tab.
- 3 Click the **Custom Level** button.
- 4 Scroll to the **Cookies** section.
- 5 Select **Enable** under **Allow cookies that are stored on your computer**.
- 6 Click **OK**.
- 7 Click **Apply**.
- 8 Click **OK**.

Configuring Your Browser to Display Chinese and Korean Characters

The ProQuest foreign language interfaces use Unicode encoding with HTML entity references. If your browser doesn't display these characters correctly, you may need to:

- [Install Chinese and Korean fonts](#)
- [Configure your browser to display Chinese and Korean characters](#)

Installing Chinese and Korean Fonts

Follow the steps below to install the fonts you need.

Windows 9x/NT/2000/XP

If you are using Internet Explorer with Windows 9x/NT/2000/XP, you can download Chinese and Korean Language Support files from the Microsoft Windows update site at <http://windowsupdate.microsoft.com/default.htm?page=productupdates>. (For detailed instructions on enabling foreign languages in Windows, see <http://support.microsoft.com/default.aspx?scid=kb:en-us:Q177561#Task1>.)

Or download the files below from the web. These files are language packs available for Office XP from Microsoft and will install the correct fonts on your system.

- Simplified Chinese - ie_zhc.exe
- Traditional Chinese - ie_zht.exe
- Korean - ie_ko.exe

Running these .exe files will install the following fonts in your system and configure Internet Explorer to use them:

- Simplified Chinese - MS Song, MS Hei
- Traditional Chinese - Ming Liu
- Korean - GulimChe

For Netscape, you need to install these fonts, then continue with [Configuring Your Browser](#).

Following is the list of other fonts you can download from sources on the web and install:

- Arial Unicode MS
- BitStream Cyberbit
- Lucida Sans Unicode
- [List of Chinese Simplified Fonts](#)
- [List of Chinese Traditional Fonts](#)
- [List of Korean Fonts](#)

Mac OS 9

You need to install the Language Kits supplied with the system CD to view Chinese and Korean characters in browsers. The following links provide

information on installing the Language Kits.

- [How to install the Japanese Language Kit in your Macintosh running OS9](#)
- [Apple OS 9 Language Kits](#)
- [How to install and use non-Roman character functionality](#)
- [Setting Up an OS9 System to Work with Non-Latin Languages](#)

Mac OS X

See [Alan Wood's resources for Mac OS X](#) for complete information.

Internet Explorer 5 and above:

If you did not download and install .exe files to install your fonts, you will need to configure your browser. Follow these steps:

- Open Internet Explorer.
- Click on **Tools**.
- Select **Internet Options**.
- On the **General Tab**, click on **Fonts...**

Select the appropriate fonts for each script. Select the font of your choice (for example, **Arial Unicode MS**) for Chinese Simplified, Chinese Traditional and Korean.

Netscape 6.1 and above:

- 1 Open Netscape.
- 2 Click **Edit**.
- 3 Select **Preferences**.
- 4 In left pane (under **Appearance**) select **Fonts**.
- 5 In right page, open the list of **Fonts for:** and select the desired character set (for example, **Simplified Chinese**).
- 6 Select a font (for example, **Arial Unicode MS**) from the list for each of the other options.
